AGELESS ELEMENTS

**GLUTATHIONE
BOOSTER**

“PROTECT THE BODY”

GLUTATHIONE BOOSTER

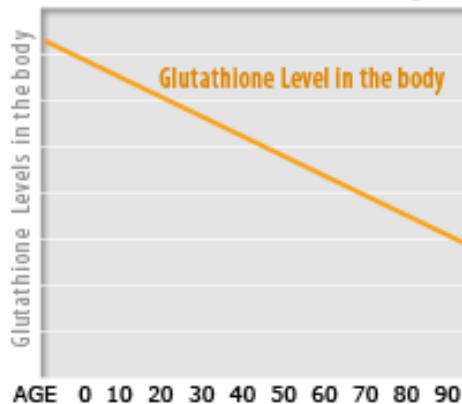

Glutathione is a material found naturally in the human body.

It is made of the amino acids Glycine, Glutamic Acid and Cysteine.

GLUTATHIONE BOOSTER

Glutathione Levels VS Age

As we age our **Glutathione** levels start to decline.

Many scientists now believe that how long we live is directly proportional to how high our **Glutathione** levels are.

GLUTATHIONE BOOSTER

Glutathione functions in our body as the master antioxidant.

Glutathione protects our body like other antioxidants, but is also capable of “recharging” and increasing your bodies levels of other antioxidants such as Vitamin A, C, and E. If you could only take one antioxidant supplement it would be **Glutathione**.

GLUTATHIONE BOOSTER

Glutathione has a potent effect on protecting the bodies protein structures such as the collagen in our skin.

Users of *LifeWave* have reported remarkable reductions in fine lines and wrinkles within a few weeks of using this product.

GLUTATHIONE BOOSTER

Glutathione is one of the most powerful materials known at being able to detoxify the body of heavy metals.

In fact, **Glutathione** injections have been used in hospitals for many years as a means to remove Mercury from the body.

GLUTATHIONE BOOSTER

As we exercise our body becomes stressed and depleted of its antioxidant supply.

By supplementing with **Glutathione** it has been shown that people can achieve remarkable improvements in their athletic performance.

GLUTATHIONE BOOSTER

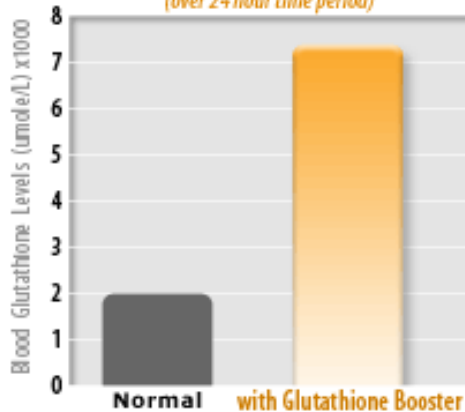

As we age our immune system becomes weaker and more susceptible to outside invaders.

It is well known that **Glutathione** is a center piece of our immune systems and can help to protect our body from harm and damage.

GLUTATHIONE BOOSTER

*LifeWave™ Glutathione Booster Study
(over 24 hour time period)*

It was discovered that when using **Glutathione Booster**, within 24 hours the average increase in **Glutathione** is over 300% HIGHER than normal.

In comparison, **Glutathione** pills and drinks only increase blood levels by a meager 10%.

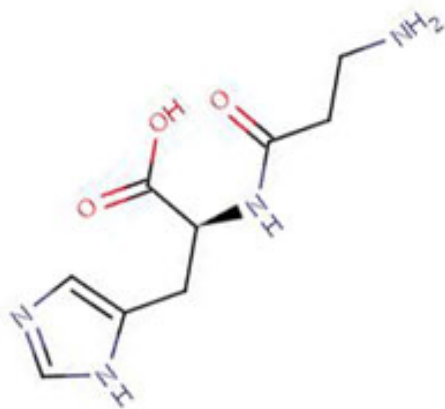

AGELESS ELEMENTS

**CARNOSINE
BOOSTER**

“REPAIR THE BODY”

CARNOSINE BOOSTER

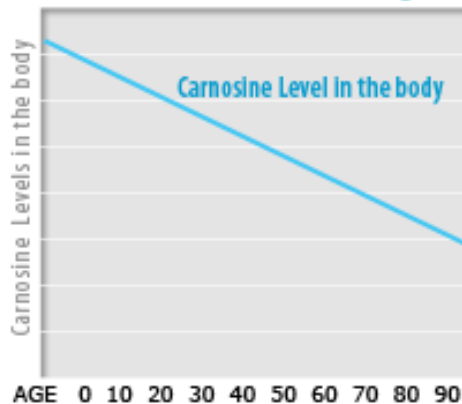

Like Glutathione, **Carnosine** is a material found naturally in the human body.

It is made of the amino acids alanine and histidine.

CARNOSINE BOOSTER

Carnosine Levels VS Age

Carnosine is an extremely powerful nutrient, but unfortunately as we age our **Carnosine** levels start to decline.

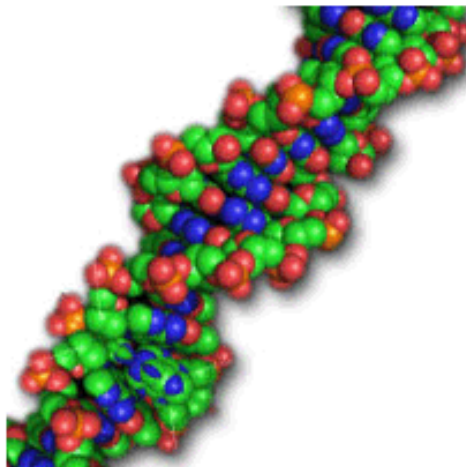

CARNOSINE BOOSTER

Senility and Alzheimers disease are thought to be linked to plaque formation on the brain.

Studies on **Carnosine** have shown that it is one of the protective mechanisms of the microvasculature of the brain, holding off the formation of plaque.

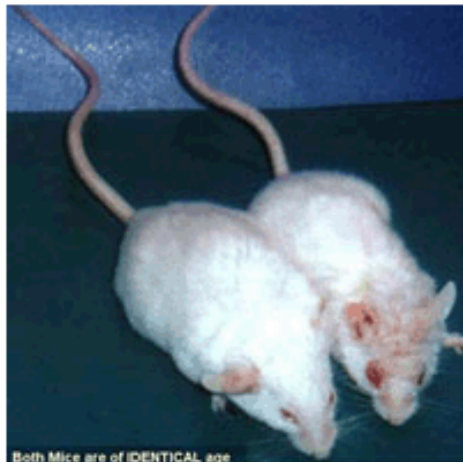

CARNOSINE BOOSTER

As we age and our cells divide the DNA becomes damaged and this has a direct impact on how we look and function.

Carnosine functions as an antioxidant in the body, and studies on **Carnosine** have shown that it protects our cells DNA from damage.

CARNOSINE BOOSTER

Studies on **Carnosine** show that it has the ability to turn old cells into young and healthy cells by repairing cellular damage.

This may translate into a longer lifespan. In the study performed (left), both of these mice are the same age. The difference is the one on the left has been supplemented with **Carnosine**.

Both Mice are of IDENTICAL age

CARNOSINE BOOSTER

Studies on **Carnosine** have shown that it has the ability to accelerate wound healing through rejuvenation of connective tissue.

CARNOSINE BOOSTER

A patent was issued in Europe for using **Carnosine** for improving athletic performance, endurance, fatigue and treating muscular disorders.
